

SUPPLIER INFORMATION

PROCUREMENT OF ENERGY-EFFICIENT PRODUCTS TO DIN EN ISO 50001

Dear Ladies and Gentlemen,

we at Klaus Union GmbH & Co. KG want to interact with our environment in a resource-conserving way. We have taken an important step in 2016 with the introduction of an Energy Management System to DIN EN ISO 50001.

As we attach importance to reducing environmental impact and increasing sustainability at all stages of the value chain, this is also important to us when it comes to our partners.

When procuring goods and services, we attach great importance to energy-efficient solutions. In future, please generally offer energy-efficient alternatives so that we can realize our goals together and look forward to a sustainable future.

If you already have a certificate to DIN EN ISO 50001, please send the current certificate to the following e-mail address:
