

Information to Declaration of Decontamination

Dear Sirs,

the compliance with laws for the industrial safety obligates all commercial enterprises to protect their employees and / or humans and environment against harmful effects while handling dangerous materials.

The laws are such as: the Health and Safety at Work Act (ArbStättV), the Ordinance on Hazardous Substances (GefStoffV, BIOSTOFFV), the procedures for the prevention of accidents as well as regulations to environmental protection, e.g. the Waste Management Law (AbfG) and the Water Resources Act (WHG).

Inspection/maintenance/repair of Klaus Union products and parts will only take place, if the attached Declaration of Decontamination is filled out correctly and completely by authorized and qualified technical personnel and is available.

Pumps which have been contaminated with liquids classified according to GHS-classification as hazardous to health  and/or harmful to health  will only be accepted in completely disassembled and decontaminated condition.

In principle, radioactively loaded equipment sent in is not accepted.

If despite careful draining and cleaning of the equipment, safety precautions should be necessary, however, the essential information shall be provided by you.

The enclosed Declaration of Decontamination is part of the inspection / repair order. Even if this certificate is available, we reserve the right to reject acceptance of your order for other reasons.

Please provide an individual Declaration of Decontamination for each piece of equipment sent to us for inspection/maintenance/repair.

Preparation for Shipment:

Prior to dispatch of the equipment/unit, the operator shall complete the following Declaration of Decontamination and attach it to the shipping documents. Furthermore, the shipping instructions given in the Operation Manual of the respective equipment shall be observed. As a minimum, the following instructions shall be observed:

- Remove operational liquids
- Hermetically close any openings
- Pack properly
- Attach a copy of the Declaration of Decontamination to the outside of the transport container
- Dispatch in suitable transport container
- If applicable, declare the equipment as "dangerous goods"

Best regards

KLAUS UNION SERVICE GmbH & Co. KG

Declaration of Decontamination

Due to legal regulations and for the safety of our employees and operating equipment, we require you fill in and sign this „Declaration of Decontamination“ before your order can be executed. (Please make absolutely sure to include it with the shipping documents and attach another copy to the outside of the packing.)

Please return your products to:
